(a) what the statistics do
statistic (pp)
successes k of $N = 10$ runs
A_{90}
U_{90}^{10}
(b) expected value vs accuracy
$\mathbb{E}[U_{90}^{10}]$ (pp)
per-instruction accuracy p (%)
$N = 10$ (original)
$N = 6$ (ours)
(c) null vs observed
observed margin (pp)
binomial-null margin (pp)
